Binnash Foundation

Oct. 2020 – Present

Co-Founder

Dhaka, Bangladesh

- Established and lead a non-profit organization dedicated to fostering sustainable development and empowering underprivileged communities in Bangladesh
- Spearheaded rural development initiatives and managed volunteer teams to promote education and social inclusion

PROJECTS

Biriyani Dibe

[Live Demo](#) | [GitHub](#)

Viral Crowdsourced Map Application

Ramadan 2025

- **Single-handedly architected and launched** a crowdsourced platform that sparked a massive national buzz, scaling to **100,000+ active users** and securing **widespread coverage across top news channels and print media** (5M+ impressions).
- **Engineered zero-downtime scaling** under extreme viral load; migrated infrastructure to Cloudflare Pages to leverage Edge caching, effectively **neutralizing DDoS spikes** and database bottlenecks.
- **Fortified open write-endpoints** against automated data-poisoning attacks (faker.js) with zero impact on UX, and **open-sourced the architecture** to lead community-driven development.

DEKHoo

[Live Demo](#)

Full-Stack Restaurant Discovery Platform

Month 2026

- **Engineered an automated Python-based ETL pipeline**, utilizing advanced Regex to extract, clean, and structure thousands of unstructured data points, **reducing manual data entry by 90%**.
- **Architected a scalable PostgreSQL backend** via Supabase to support real-time data synchronization and complex array-based queries for dynamic, area-based filtering.
- **Developed a premium, mobile-first frontend** utilizing **React.js** and **Tailwind CSS**, introducing an immersive edge-to-edge swipe interface and a secure administrative dashboard for content moderation.

Hospital Management System

[GitHub](#)

Full-Stack Healthcare Platform (MERN)

Month 2024

- **Architected a scalable microservices backend** utilizing Node.js, Express, and MongoDB, decoupling user authentication from core hospital operations to optimize system maintainability.
- **Engineered secure Role-Based Access Control (RBAC)** utilizing JSON Web Tokens (JWT) to enforce strict data privacy across Admin, Doctor, and Patient authorization tiers.
- **Developed a dynamic React.js frontend** to streamline complex clinic workflows, including automated appointment scheduling, patient record management, and integrated billing.

LEADERSHIP & ADDITIONAL EXPERIENCE

PUBG Mobile (8th Anniversary Tour)

Media Production Team Manager

- **Directed end-to-end media production** for a major esports anniversary tour, leading a cross-functional team to capture and deliver high-impact digital assets.
- **Managed content strategies and production workflows** under tight event deadlines, ensuring all social media outputs aligned perfectly with the game's core aesthetic.

Infinix Mobile

Project Supervisor

- **Supervised multiple concurrent digital media projects**, overseeing the complete project lifecycle, team workflows, and final deliverable quality for a global smartphone brand.
- **Acted as the primary bridge** between production teams and stakeholders, ensuring all outputs met strict corporate branding standards and timeline requirements.

EDUCATION

International University of Business Agriculture and Technology

Jan. 2023 – Dec 2026

Bachelor of Science in Computer Science and Engineering

Dhaka, Bangladesh

- **Coursework:** Data Structures, Algorithms, Databases, Computer Systems, Machine Learning, Artificial Intelligence, Computer Vision, C, C++, C Sharp.
